Peckish Large Parrot blend is a mix of all-natural micro-pellets containing real vegetables and greens with the traditional seeds that birds love for added variety and to meet the nutritional requirements of large parrots like Cockatoos, Major Mitchells and Galahs.

Filled with all-natural greens like alfalfa, kale and parsley, birds will benefit from the high levels of protein, calcium and iron. The tasty addition of peanuts will also provide them with Vitamin E for better immunity. Meanwhile, the fruit micro-pellets are made with real blueberries, black currants & blackberries for a sweet taste and extra antioxidants, while the vegetable micro-pellets are made with real carrots for a natural source of Vitamin A. Further enhanced with our specially designed VITA-ENRICH Pellet, the extra boost of added vitamins and minerals helps to encourage optimum health in large parrots.

Ingredients:
