

Peckish[®] Produce

PECKISH PERFORMANCE LAYER PELLETS

For quality eggs and your hen's health, Peckish Performance Layer Pellets are specially formulated with high levels of protein and energy for top performance in egg productions and fertility rates. Peckish Performance Layer Pellets are a premium ration featuring added calcium, phosphorus and trace elements for optimum eggshell quality and maintaining hen's health.

Feeding Instructions:

To be fed ad-lib from 18-20 weeks old onward or about 10-14 days prior to commencement of lay. Egg production usually begins at around 20-22 weeks of age. Consumption of Performance Layer Pellets may vary depending on available supplements such as wheat or kitchen scraps. A recommended minimum is 110 grams per bird per day. This may also vary depending on hen size, egg production and climate change.

Ingredients:

Selected from: Oats, Maize, Wheat, Barley, Triticale, Lupins, Canola Meal, Soya Meal, Lucerne Meal, Vegetable Oil, Limestone, Di-Calcium Phosphate, Salt, Vitamin & Mineral Premix.
