

WagTime Air Traveller - Large 81 x 56 x 59cm

PLEASE READ BEFORE USE

- When using your carrier for air travel, check with your airline for their specific rules and requirements prior to travel.
- This carrier is not designed to restrain dangerous animals or dangerous breeds of animals.
- To help prevent choking and other serious injuries, remove all collars, harnesses, and other items, such as pet clothing, before placing your pet in the carrier.
- A pet that is not familiar with being contained, may attempt to escape by digging and/or chewing out of the carrier. This may cause serious injury or death. Consult your veterinarian or trainer to determine an appropriate training method and length of time your pet can safely be kept in the carrier.
- Vendor is not responsible for any loss caused by improper use of this product or for use of this carrier by a pet that has not been properly trained.
- Do not place more than one pet in the carrier at a time.
- Do not allow children to play on or in the carrier. Keep carrier door closed around children to avoid risk of injury from protruding hinges or latches.
- Periodically check the plastic shell for cracks, especially after exposing the carrier to severe shock, changes in temperature, or harsh or challenging conditions.
- Never stack carriers with pets inside.
- Discourage aggressive behaviour in the carrier. Biting, chewing, licking, ramming, or pawing at either the plastic shell or metal wire may result in injury to your pet or damage to the carrier. These are excluded from this product's warranty.
- Exercise caution when opening and closing the carrier door to avoid catching your pet's paws, tail, or snout in the mechanism.
- Never leave pets in a closed car.
- Regularly clean your carrier for the hygiene of your pet.

CONTENTS:

Top Half

Bottom Half

Bolts x 10

(includes 1 spare)

Fastening nuts x 10

(includes 1 spare)

Locking Latches x 8

Door

Wheels x 4

1. Begin by removing the plastic ties that separate the two carrier halves.

2. Place the grey half of the carrier with the flat side on the floor. Place the white half, with the handle side up, onto the bottom half of the carrier, ensuring that all the parts are aligned.

3. Lift the top half slightly and insert door rods into the recessed holes, ensuring that the door will be able to swing open using the black handle. Again, ensure that all the pieces are aligned.

4. Insert the bolts from the underside of the rim securing using the specially designed nuts. Tighten nuts by hand. Check these periodically throughout use to ensure they maintain their tightness.

5. You will now want to install the locking latches around the rim of the carrier.

To do this:

- Snap hinge into place on the underside of the rim.
- Clamp latch onto the top half of your carrier and push in. Sliding the grey button will lock/unlock the latch.

6. Flip your carrier over so you have full access to the bottom. Install the two wheels with brakes to the front of the carrier (door end) and the two wheels without brakes to the back. To attach the wheels, hold the plastic tab down and slide the wheel in until it snaps into place.

Your carrier is now ready to be used!
